DETAILED ACTION***Information Disclosure Statement***

1. The information disclosure statement filed June 26, 2003 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because it does not list the application number of the application being examined. It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).a

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 3752

2. Claims 24-33 rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,360,962 to Vetter et al. Although the conflicting claims are not identical, they are not patentably distinct from each other because it is recognized that the flow across a known continuous conical overflow surface would be laminar in nature and that the angles presented in the claims are merely obvious angles with the prior art considerations. It would have been obvious to one skilled in the art at the time the invention was made to have modified the claims 1-14 of Vetter et al. ('962) so that flow would have been claimed as laminar in nature and that the angles of the cone would have been within prior art considerations

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure is as follows.

U.S. Patent No. 6,623,561 to Vetter et al., disclosing a paint zone system

U.S. Patent No. 6,341,734 to Van Der Stuer, disclosing a rotary atomizer and bell cup.

U.S. Patent No. 6,189,804 to Vetter et al., disclosing a rotary atomizer

U.S. Patent No. 6,578,779 to Dion, disclosing a rotary atomizer with a bell element
